20a. How does the Committee accomplish its purpose?

The Board is composed of recognized biomedical and/or behavioral research authorities who represent the forefront of research and technical knowledge and who provide evaluation and peer review of Institute laboratories and staff scientists in the following areas: vision research, ranging from clinical ophthalmology and ophthalmic pathology to the basic sciences.

20b. How does the Committee balance its membership?

The Board consists of seven members who are outstanding authorities knowledgeable in the specialized fields of eye and vision research, ranging from clinical ophthalmology and ophthalmic pathology, to the basic sciences. The advisory role of the Board is scientific and substantive. The Board, through periodic visits to the laboratories, assesses the research in progress and evaluates productivity and performance of principal investigators.

20c. How frequent and relevant are the Committee Meetings?

The Board held two meetings during this reporting period for the peer review of intramural laboratories on a rotating basis, as required by the PHS Act.

20d. Why can't the advice or information this committee provides be obtained elsewhere?

This Board is composed of recognized biomedical research authorities from outside the NIH in order to secure unbiased and objective evaluation of intramural research programs. Their recommendations are invaluable because the complex nature of research in each laboratory requires a unique balance and breadth of expertise not available on the NIH staff or from other established resources.

20e. Why is it necessary to close and/or partially closed committee meetings?

The meeting of the Board is closed for the review, discussion, and evaluation of individual programs and projects conducted by the Institute, which include the consideration of personnel qualifications and performance, the competence of individual investigators, and similar items, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy. Section 552b(c)(6) of the Government in the Sunshine Act permits the closing of meetings where discussion could reveal personal information, and disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Narrative Description

The goal of NIH research is to acquire new knowledge to help prevent, detect, diagnose, and treat disease and disability, from the rarest genetic disorder to the common cold. The NIH mission is to uncover new knowledge that will lead to better health for everyone. NIH works toward that mission by conducting research in its own laboratories. Section 402(b)(3) of the Public Health Service Act states that the Director, NIH...shall assure that research at...the National Institutes of Health is subject to review in accordance with section 492. Section 492(b) states that the Director of NIH shall establish procedures for periodic technical and scientific peer review of research at the National Institutes of Health. This Board assesses the quality of the Institute intramural research programs and evaluates the productivity and performance of staff scientists, necessary functions of a highly effective intramural research program.

Cost Savings Comments

NIH supported basic and clinical research accomplishments often take many years to unfold into new diagnostic tests and new ways to treat and prevent diseases.

What is the approximate Number of recommendations produced by this committee for the life of the committee?

44

Number of Recommendations Comments

The Board held two meetings during this reporting period. The Board of Scientific Counselors makes recommendations that address the specific laboratory under review. The reviews are scheduled on a 3-4 year rotation. The recommendations are implemented at the direction of the Institute Director and the Scientific Director.

What is the approximate Percentage of these recommendations that have been or will be Fully implemented by the agency?
